Jesse Pence

Software Engineer

SUMMARY

Creative, outgoing software engineer with a passion for automation and machine learning. Developed functional front and back end web applications both alone and in a collaborative environment. Now searching for a larger tech company in which to grow.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

October 2021 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Jessedit (Fullstack Web App) – A simple Reddit clone built on the MERN stack that includes user profiles, nested comments, and the ability to include attachments.

QuoteBook (Fullstack Web App) – A quote storage system built using MVC architecture that includes user authentication and a Quote of the Day feature.

100 Hours Project – The Terpene Wiki - An exhaustive source of current research information for all pertinent terpenes found in cannabis.

Other Projects:

Full Stack Web Developer at Jovial Penguin | Vancouver, WA

October 2021 — Present

Created full stack web applications and static websites for different clients across small and medium size businesses. Also, consulted on SEO and social media strategy. Some clients included:

Example Client: Electric Larry's (website here)

Lead Bartender at Buck's Restaurant | Louisville, KY

August 2019 — March 2020

Crafted 8 new, original cocktails that comprised the Fall and Winter seasonal cocktail menus. Designed and executed house-made syrups and shrubs for seasonal menus using all fresh fruit and botanicals. Learned how to lead and instruct servers on proper execution of cocktails.

VOLUNTEERING

Scatter Creek Wildlife Area Restoration

March 2020 — Present

Helped organize clean-up efforts for a local campaign of the Washington Department of Fish and Wildlife
